EXPERIENCE

COOP Training

📅 May 2019 – July 2019

📍 Saudi Arabia, Dhahran

I did the training in ROSEN company in Dhahran Techno Valley for 10 weeks. I did many things in training and one of them python language in images, signals and designing algorithms to solve problems and research of some information about machine learning and other topics.

SKILLS

- I am familiar with java language
- Good knowledge of using MySQL software to build the database
- Designing algorithms that work very well and has good performance and readable by any person
- Thinking in different way to solve problems using logic and the solution that I figure out has high efficiency to solve the specific problem

PROJECTS

Project 1

Gifts Store/Shop

I implemented application with my group using java language, MySQL software and this application is about online gifts store "For You" and it has many categories that related to it.
